POWER, VOICE & DATA DISTRIBUTION UNITS FOR DESK TOP APPLICATIONS

Olson Electronics has expanded its range of products to now include a range of desk top units to BS 6396:2008 Electrical systems in office furniture and educational furniture.

Trailing sockets used on the floor under desks represent a trip hazard but to move power distribution on to the desk top environment, or within the furniture, requires compliance to the British Standard.

Desk Unit Standard Features

- Desk Units are manufactured from robust aluminium body with an anodised silver finish
- Supplied with 13A plug & 3m lead as standard
- Exterior earth terminal as standard
- No more than 4 sockets separately fused at no greater than 5 amps
- No more than 6 sockets separately fused at no greater than 3.15 amps
- Data and media combinations possible with segregation
- Data / media options include Cat 5E, Telephone, HDMI, sVGA, USB & more
- Optional desk unit fixing brackets or direct fixing bolts available.

Many bespoke product variants are possible and can be customised to suit your individual requirements. Please contact our sales hotline.

NEW UNDER DESK BASKET TRAY

Recently included in the ever growing Olson product portfolio is the new under desk basket tray.

Ideal for keeping cables under office desks neat, tidy and out of sight, preventing tripping or accidentally pulling/kicking cables under your desk.

- Available in four standard lengths; 600mm, 800mm, 1000mm and 1200mm
- 100mm x 50mm 4.0mm diameter zinc coated steel wire frame
- Offers a very high weight to strength ratio
- Supplied with two specifically designed basket tray brackets that use a tongue hook system, meaning no additional bolts are required
- Can be used as a bankable system by bolting brackets together vertically
- Special lengths are available upon request
