## **ECA - Monday 22nd at 9am**

What you need to know about fire stopping.

Fire stopping is, and has been for a long time, a misunderstood requirement. Today we will run through the legalities regarding this critical safety measure and why this is vital to the electrical contractor.

## **AMINA - Monday 22nd at 11am**

Starting out with AMINA.

Amina will introduce you to the technology behind our invisible speakers, and a brief overview of their products, give inspiration for possible applications and the different ways the AMINA team can support and add value when planning your projects.

## **ECA - Tuesday 23rd at 9.30am**

Electric Vehicles and the key considerations for electrical installers.

Luke Osborne, ECA Energy Solutions Advisor: Luke's presentation will be covering the advancing adoption of Electric Vehicles and key considerations for electrical installers when installing EV charge points.

## **AMINA - Tuesday 23rd at 1pm**

Dispelling the myth.

Specifying surprisingly affordable invisible speakers with confidence, and overcoming misconceptions that choosing invisible speakers must compromise either sound quality or cost, Amina dispels the myth!

## **SAVANT - Tuesday 23rd at 3pm**

Why being a Savant Integrator will increase your business potential.

By combining intuitive user interfaces with beautiful hardware, the Savant home automation platform is considered amongst the most technologically advanced in the industry. With a wide range of options covering every facet of the automated home, Savant integrators have been powering luxury homes all over the world.

## **Scolmore - Tuesday 23rd at 6pm**

Scolmore will be demonstrating during this session - Design considerations of Smart product installations.

Darren Staniforth and Jake Green will be looking at all types of Smart installation and confirming which forms of communication work best with Smart Technology. They will explain how open protocols work with your installations, whilst discussing what aspects need to be considered when designing a Smart system.

## **Lighthouse - Wednesday 24th at 9am**

The Lighthouse Construction Industry Charity is the only charity that provides mental, physical and financial wellbeing support to the construction community and their families. Learn about the free resources available including their 24/7 Construction Industry Helpline and app, free wellbeing and mental health training and how you can get involved. Bill Hill the The Lighthouse club charity's CEO will tell you how.

## **NAPIT - Wednesday 24th at 3pm**

NAPIT's EICR Codebreaker webinar presented by Frank Bertie, Chief Technical Officer and Paul Chaffers, Technical Events Manager, addresses the possible dangers of electrical installations, and considers some real-life findings and observations to consider when carrying out Electrical Installation Condition Reports.

Other topics to be covered include:

- Clients responsibilities
- Inspectors responsibilities
- Dangerous situation report
- Isolating dangerous installations
- Common misconceptions

You will be able to interact during the session and have your say on possible codes as well as engage in Q&A with presenters at the end of the webinar.

## **FIBARO - Wednesday 24th at 4pm**

FIBARO's unique wireless home automation system.

This session will be presenting the unique way, that has been taken by FIBARO to create the wireless home automation system - a smart environment where various home appliances communicate with each other providing maximum level of comfort, security, and to the installer - great opportunity to expand business.

## **Recolight - Thursday 25th at 9am**

The WEEE Regulations - An essential update for electrical contractors.

Recolight explain how the WEEE Regulations work, what you need to do as a contractor to stay compliant, and how you can use the regulations to your advantage.

Join Lyndsey Tweddle Elaine O'Keeffe Charlotte Durling and Suzanne Castine for the do's and don'ts on this important subject.

## **CENTIEL - Thursday 25th at 2pm**

Loise McGarry explains CENTIEL's distribution technology.

Louis McGarry, Sales & Marketing Director CENTIEL UK, will explain why CENTIEL's Distributed Decision Making (DDM) technology is a real differentiator for Modular UPS systems. This will include how CENTIEL achieves such high levels of availability, and how an agile approach to UPS implementation, combined with a careful calculation of actual load requirements from day one, means it is possible to reduce costs but be flexible to accommodate future growth. He will also be joined by Sales Engineer Aaron Oddy, CENTIEL UK who's expertise in implementing this technology into smarter configurations can help reduce your systems TCO, creating a compelling argument to help you win the battle of the budgets.

## **CEDIA - Thursday 25th at 3pm**

Grow Your Business to Include Smart Home Technology with CEDIA.

Technology is revolutionising how we enjoy and experience life at home, and the COVID pandemic has only accelerated these trends. People are spending more time at home than ever before, and technology has become essential to live, work, and play in the modern home. As a result, business opportunities are booming! As an electrician, you're already through the door, so why not offer more? Find out how we can help you expand your horizons, broaden your portfolio, and grow your business into this new, exciting sector.

Established over 30 years ago, CEDIA globally supports the home tech industry to take advantage of this staggering growth by providing professionalism and credibility to their business. Professional education, apprenticeship scheme, careers centre, industry certifications, and leading knowledge and content are just some of the benefits of joining this community.

The smart home industry is skyrocketing, with the global market expected to reach £100 billion by 2025. Be a part of that growth and discover how we can help.
